rath's pr 2000 Skin Care Lotion

PRODUCT DESCRIPTION

Skin care lotion, type O/W emulsion (oil-in-water), rich in active ingredients, smooth, easily spread able and highly absorbing, with the active ingredients Allantoin, Panthenol, Vitamin E-Acetate, Bisabolol and Vitamin F-Glycerinester as well as re-greasing and moisturizing components.

Silicone-free. Available slightly perfumed or unperfumed.

HACCP assessed.

FIELD OF APPLICATION

For the regular care of your hands and entire body - suitable for all types of skin.*

FUNCTION

Re-greasing and moisture-regulation of the skin.

Supports the regeneration of industrially stressed skin by Allantoin, the active ingredient with irritation alleviating effect, Bisabolol and Panthenol as the active ingredients with anti-inflammatory and wound healing properties as well as the multifunctional skin protection vitamins E and F.

Strengthens the natural protective function of the skin.

USAGE AND DOSAGE

pr2000 is very economical. After cleansing the skin, put the cream on sparingly but thoroughly. Depending on the individual skin absorption capacity, you will need approx. 0.5 - 1 ml for your hands.

Very well suitable also for the entire body care.

SIZES AVAILABLE

125 ml bottles

1 litre bottles

1 litre soft bottles

DOSING AIDS

Please refer to pr-Dispenser leaflet.

***Note:** If more re-greasing is necessary, for the care of very dry skin, we recommend our skin protection and skin care lotion pr99.

PRODUCT INFORMATION

Due to repeated contact with a wide range of pollutants and due to frequent washing of the hands during everyday industrial work, the protecting hydrolipid layer (formerly: acid protective layer) and the horny layer of the skin are negatively disturbed. Thus, the skin loses its natural barrier and protective function. The direct consequence of this is dried out, brittle and cracking skin.

In order to prevent such damage, fat and moisture needs to be added to the skin after final cleansing. The re-greasing effect of pr2000 helps the skin to remain supple and elastic. Special substances clearly improve the moisture-retaining capacity of the skin, measured by the natural moisturizing factor (NMF).

pr2000 is a smooth, soft, easily spread able and highly absorbing water-in-oil emulsion (w/o-emulsion).

To support the regeneration of industrially stressed skin, pr2000 contains the following cosmetic active ingredients:

Allantoin soothes skin irritations, enhances the skin's moisture-retaining capacities and helps to regenerate the cells.

Panthenol (provitamin B₅) has an anti-inflammatory effect and is wound healing (epithelializing).

Vitamin E-Acetate: Multifunctional skin protection vitamin, increases the moisture-retaining capacity of the skin, has an anti-inflammatory and epithelializing effect, and protects against free radicals.

Bisabolol (an essential active ingredient of camomile) has an anti-inflammatory and erythema-inhibiting effect (erythema = skin reddening) and is also wound healing.

Vitamin F Glycerinester (complex of essential esterified fatty acids) has an bacteriostatic and anti-inflammatory effect and prevents against rough, dry and brittle skin.

pr2000 is skin-type neutral. If more re-greasing is necessary, we recommend the use of our skin protection and care lotion pr99.

SKIN COMPATIBILITY

Dermatest GmbH, Society for Allergological Research, D-48155 Münster
pr2000 has been certified a very good skin compatibility based on a dermatological test on human beings.

No allergic or toxic-irritative reactions of incompatibility occurred during the patch test in accordance with international guidelines.

INGREDIENTS (INCI)

Aqua , Paraffinum Liquidum, Cetearyl Octa-noate, Cetearth-25, Propylene Glycol, Cetearth-6, Stearyl Alcohol, Allantoin, Glyceryl Stearate, Cetearyl Alcohol, Panthenol, Tocopheryl Acetate, Tetrahydroxypropyl Ethylenediamine, Bisabolol, Glyceryl Linoleate, Glyceryl Linolenate, Phenoxy-ethanol, Methylparaben, Ethylparaben, Propylparaben, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, (Parfum).

Note: The product is also available without perfume.

ENVIRONMENT

pr2000 is highly biodegradable.

Water danger class (self-classification): 1.
