

## PRODUCT INFORMATION

- rath's care soft cares for the skin and helps to
- prevent chapped, cracked and dry hands
- Very light and quickly absorbed, lotion rich in
- active ingredients
- Promotes the regeneration of stressed skin

**rath's  
care  
soft**  
Skin-care lotion

### Application range

For mildly stressed skin - hand & body

Regular use after work helps to maintain the skin's natural protective function. Skin care products thus play a key role in preventing skin disorders.

### Application and Dosage

rath's care soft is highly economical in use. After cleaning, carefully massage a small amount into the skin. Dosage approx. 0.5-1 ml.

rath's care soft for regular care of the hands and body.

## ADVANTAGES

**With a high proportion of natural ingredients**

- No microplastics
- No mineral oils
- No silicone
- Quickly absorbed
- High in effective ingredients
- pH-neutral
- Available discreetly perfumed or unperfumed
- HACCP-evaluated (unperfumed version)
- Very good skin compatibility - dermatologically tested

## care soft

Skin-care lotion

### Product advice

rath's care soft is a very light oil-in-water emulsion with a high proportion of natural active ingredients. These ingredients nourish mildly stressed skin in two ways:

1. they reduce and regulate water loss within the skin and
2. promote the regeneration of stressed skin

The loss of water is reduced with natural skin moisturising factors like lactic acid and vegetable glycerin combined with natural sugar polymers derived from red algae and konjac root.

At the same time, the water balance is regulated by essential fatty acids like linoleic acid, derived from organic sunflower oil, and linoleic acid from peanut and rapeseed oil.

Several anti-inflammatory substances, such as α bisabolol, piceol and provitamin B5, work together with allantoin and a vitamin E complex comprising natural tocopherols and vitamin E acetate to regenerate stressed skin.

### Safety and applicable laws

As a skin product, rath's care soft, is subject to the legal specifications in the EC Cosmetics Ordinance (Ordinance (EC) No. 1223/2009).

### Dispensers and dosage systems

A selection assistant for dispenser and dosage systems can be found online at [www.rath.de](http://www.rath.de) or give us a call - we are happy to help.
